About This Game

Meet Bleep and Bloop as they help each other overcome all the challenges that stand in their way. A light-hearted and playful puzzle game about working together.

Play alone controlling both characters or share the experience with a friend. Bleep Bloop is extremely easy to learn, but that doesn't mean the puzzles will be a piece of cake.

-
- Enough levels to keep you entertained during a lazy Sunday, but not enough to make you wish the game had ended already.
 - Beautiful soundtrack that makes getting stuck on a level a bit less painful.
 - Perfect for single-player or two-player coop. Yelling at each other doesn't improve your puzzle-solving skills, but it's always fun.
 - Features a small secret hidden somewhere. Go look for it.

This puzzle game is perfectly balanced, and I never feel rushed to find a solution. The music is so beautiful that I don't mind being stuck in a puzzle for a bit until inspiration strikes. There are no dead ends, time limits, or turn limits, so you are free to explore for a solution. Even the occasional "death" rewinds to the last good checkpoint.
